

Greenough Blvd 1500 meter Race Walk Loop, Watertown MA

Measured July 5 and July 7 2005
by Justin Kuo (617-731-9889)

The race walk loop is 1500 meters (750 meters out and 750 meters back.) Splits are located at 250 meters and 500 meters. "Outer PK nails" on the east and west turnarounds mark the sharp, 180 degree, hairpin turns. "Inner PK nails" are used to locate a more gentle turn with a 3 meter radius.

Start: on Greenough Blvd, 250 meters east of west turnaround; PK nail and paint 30cm from curb on eastbound lane; 32.64' east of storm drain on eastbound lane; 42.57' E of S.D. on westbound lane; 82.90' E of sewer cap on sidewalk.

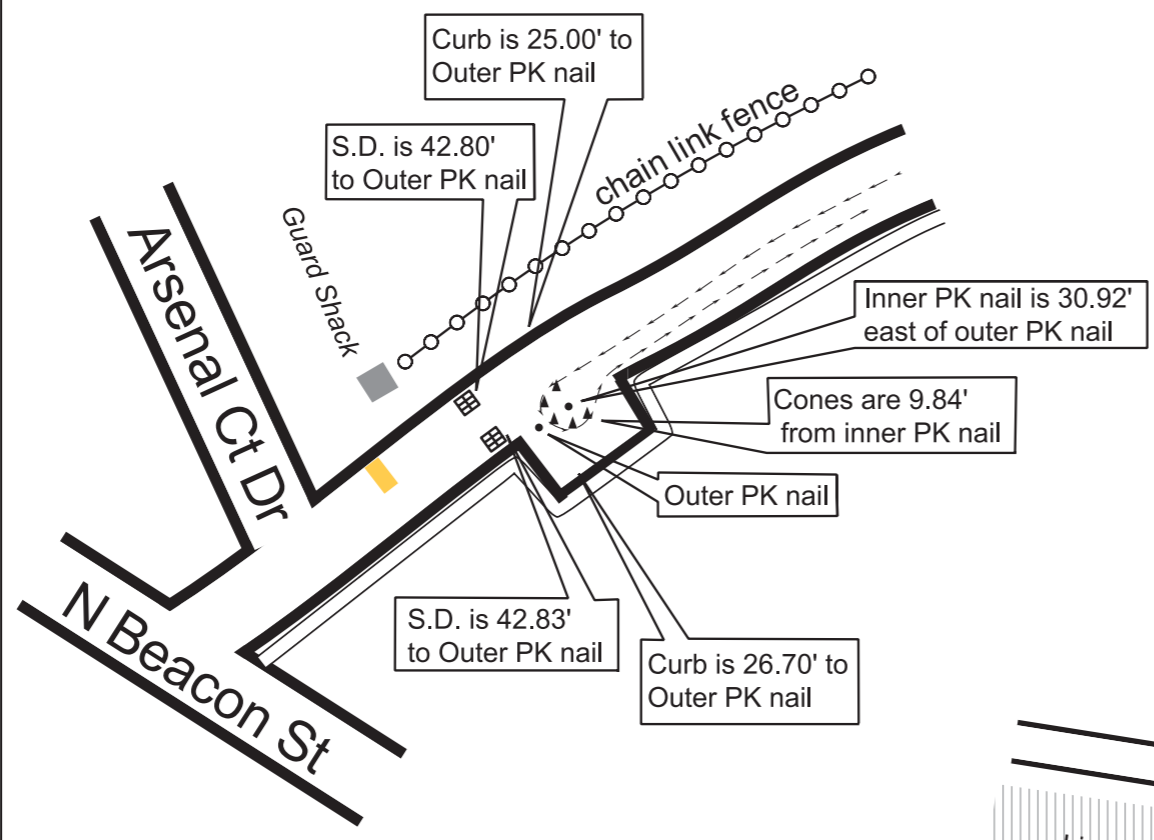

250m split: on Greenough Blvd, 250m west of east turnaround; PK nail and paint 30 cm from curb on westbound lane; 48.65' W of S.D. on westbound lane; 19.10' E of nearest steel post at opening of chain link fence; 65.00' E of fire hydrant near westbound lane.

East turnaround (Outer PK nail): on Greenough Blvd, near Arsenal St; PK nail and paint 25.00' from curb on westbound lane; 26.80' from curb in parking lot; 47.70' W of S.D. on eastbound lane.

West turnaround (Outer PK nail): on Greenough Blvd, near N Beacon St; PK nail and paint 25.00' from curb on westbound lane; 26.70' from curb in parking lot; 42.83' E of S.D. on eastbound lane; 42.80' E of S.D. on westbound lane;

(The East and West Inner PK nails are 30.92' from their respective Outer PK nails. They become the center of 3 meter (9.84') half circles. Cones are placed on the half-circles. Five PK nails are located at each half-circle.)
